Appendix — corrections applied against the Ancestry export of 19 Jul 2026

1. Death dates restored from registration dates to documented death dates: Tiburcio (30 Mar 1966), Antonio (9 Jul 1956), Severiano (31 Aug 1964), Ramona (12 Jun 1954), Cirilo (10 Nov 1905), Espiridión (9 Apr 1917).
2. Tortugas placed in Huanusco, Zacatecas (not Aguascalientes) throughout.
3. Marcial Serna's baptism corrected to Arroyo de Soto, Calvillo parish (e.249), matching his sister Salomé (e.323); Salomé's birth corrected from "abt 1850" to Oct 1852.
4. Zeferino Gómez's birth corrected from "abt 1850" to abt 1833 (his own sworn 1863 declaration); death window corrected to 1873×1881.
5. Norberto Gómez's birth widened to abt 1805–1815 (the tree's "abt 1810" made him father a child "b. abt 1820").
6. Removed unsupported out-of-region birthplaces: Matías López de la Serna ("Actopan, Hidalgo") and Juana María de Esparza ("Marinilla, Antioquia, Colombia" — she is a documented Calvillo Esparza).
7. Casimira Gómez's death tightened from "bef 1890" to before Apr 1888 (documented).
8. Added the documented couple José [Salomé] Méndez × Seberiana Vargas at positions 42–43 (absent from the tree).
9. Flagged the 38×39 repetition (via María Práxedes Serna) as an unverified hypothesis; the 44×45 repetition (via Marcial) is fully documented.
10. Juana Gómez Serna's exact birthdate (19 Jan 1916) downgraded to tree-asserted pending source; the loss of both civil birth registers 1913–17 is documented.
11. Living individuals (Nos. 1, 3) withheld.
